LEVEL 3 ASSOCIATES HITS THE GROUND RUNNING AT AERODEF EXHIBIT 2019

MARIETTA, GA., March. 7, 2019, - Level 3 Associates, (L3A) is pleased to announce their attendance at the Aerodef Exhibit 2019 in Long Beach, California. Level 3 has been preparing for an exciting exhibit that is sure to expose, educate, and entertain those in attendance.

For the past 11 years, Level 3 Associates has offered NDT services to companies seeking quality inspections on various components, parts and materials. L3A not only provides NDT services to the aerospace and defense markets but also within the public, private and government sectors as well.

While at Aerodef, Level 3 Associates will be displaying how their NDT methods would benefit composite and aerospace manufacturers. While most companies use traditional NDT methods, L3A has invested in advanced ultrasonic and digital radiography test methods that provide consistent and accurate results.

The President of Level 3 Associates, Frederick Williams stated, "We have researched and invested in advanced machinery to ensure our customers are more than satisfied with the service they receive from our technicians and our company. "One of the ways L3A has done this is by utilizing a contour following 10-Axis Overhead Gantry Scanner which is designed for scanning complex composite and solid laminate components. This technology makes Level 3 Associates a forerunner when it comes to advanced composite inspections.

One of the benefits L3A has experienced by investing in advanced technology is their ability to continuously provide quality inspections and great customer service in a timely fashion. They strive to effectively and efficiently provide clients with innovative NDT solutions to meet a myriad of customer requirements.

This exhibit presents the opportunity for testing service exposure not only for Level 3 Associates, but for other companies that may potentially use L3A's NDT services. Level 3 Associates can be found at booth #1744, where they will be sharing vital information in a fun and exciting way. Refreshments will be served and knowledge about the industry will be shared. Check them out and spread the word!
